SOCIETAL IMPACT STATEMENT

My research focuses on the intersection of corporate taxation and financial reporting, including how corporate stakeholders' perceptions shape corporate tax behavior and tax transparency. Thus, my research enhances our understanding about the role of taxation on public perceptions of corporate social responsibility. In the classroom, I discuss taxation and its connection with other parties involved. By doing so, I encourage students to be aware of the impact on society when making tax-related decisions at both the individual and the business level.
