

DEPARTMENT OF FINANCE DOCTORAL PROGRAM

The Ph.D. in Business Administration degree with finance as a major field of study brings the Ph.D. student to the leading edge of knowledge in the field. Rigorous course work and research activities provide the student with an in-depth understanding of the theoretical, conceptual and managerial foundations of finance. The program has three primary objectives:

- ▶ Developing advanced competencies for conducting quality research, directing research of others and communicating research findings through teaching and writing
- ▶ Preparing candidates for the varied responsibilities of academic careers or for positions requiring similar research and analytical skills
- ▶ Providing candidates with the tools needed to publish their research in top-tier finance academic journals

The Mays doctoral degree gives the candidate a thorough and comprehensive knowledge of the professional field and training in methods of research. The final basis for granting the degree is the candidate's grasp of the subject matter of a broad field of study and a demonstrated ability to do independent research that makes a significant contribution to the body of knowledge.

In addition, the candidate must acquire the ability to express thoughts clearly and forcefully both orally and in writing. The degree is not granted solely for the completion of course work, residence and technical requirements, although these must be met.

FACULTY AND RESEARCH INTERESTS

Christa Bouwman, *Acting Department Head, Associate Professor,*
Patricia & Bookman Peters Professor of Finance
Financial Intermediation, Corporate Finance, Mergers and
Acquisitions, Behavioral Finance, Corporate Governance

Boone Bowles, *Assistant Professor*
