SOCIETAL IMPACT STATEMENT

As society and organizations become increasingly complex, organizational members are being asked to deal with a variety of difficult and novel situations. My research seeks to discover how employees navigate their workplaces through interactions with their peers, supervisors, and the work itself. I also investigate how one's social context influences the outcomes and processes of these interactions. In terms of teaching, my aim is to give students the knowledge necessary to thrive in numerous organizational and social contexts, as well as motivate them to become effective and ethical leaders.
