- Introductory Data Structures

Aug. 1981 – Aug. 1985

Programmer/Systems Analyst

Texas A&M University, Data Processing Center

Dept of Human Services, Austin, Texas

Developed applications for accounting, inventory and personnel systems.

Societal Impact Statement

My main societal impact at Texas A&M is through my interaction with the students in the undergraduate classes I teach.

I teach large sections of freshmen and sophomores in the business school, and I strive to foster an atmosphere of welcome and mutual respect and encouragement for all of them.

I am a first-generation college student, and I remember my feelings of trepidation well. I try to make every student realize they can achieve success. I strongly encourage them to visit with me about any concerns in the class, and I am receptive to these concerns.

We build a better society when we help mold hard-working, responsible, respectful, caring students – I have an attitude toward my students that is expectant of these qualities, and my attitude encourages them to treat all others with the same respect.
